About Us

With many years experience in the seed industry, Seeding Victoria has consistently demonstrated its ability to deliver appropriately sourced indigenous seed for revegetation works throughout Central, South West and North West Victoria. As a community not-for-profit charitable organization, Seeding Victoria manages a network of seedbanks and runs a series of seed collector's workshops and information sessions.

NRCT Seed Bank Revolving Fund

The Revolving Fund, made possible through a Natural Resource Conservation Trust grant, aims to increase the number of seed collectors and native seed supply for revegetation projects across the state. For each of the species listed per region, 25% of the seed's wholesale price will be immediately paid to a collector. The remaining 75% will be paid to a collector following the retail sale of their stored seed. The original 25% will be returned to the Revolving Fund to be used to pay other collectors. The Fund will only accept the seed species listed in this brochure. Contact Seeding Victoria for the yearly quantities required per species per year.
