

NRCT Revolving Fund 2025 Seed List

Seeding Victoria is operating a Seed Revolving Fund to provide early remuneration for seed collectors, made possible through a Natural Resource Conservation Trust grant. For each of the species listed per bioregion, 50% of the seed's wholesale price will be immediately paid to a collector up to the weight of the cleaned seed (grams) listed. The remaining 50% will be paid to a collector following the retail sale of their stored seed.

This list will be updated and re-issued to collectors, including additional species and weight adjustments, as seed is progressively delivered to the Seedbank and demand for species changes over time. Please check our website www.seedingvictoria.com.au for the latest Revolving Fund Seed Listing.
